

Software Developer at Qvonto

Join Qvonto's mission to simplify compliance and empower financial institutions across Europe.

About Qvonto

Qvonto, a Danish fintech company, is developing cloud solutions for advanced regulatory document production for Europe's financial sector. Our mission is to eliminate the complexity of regulatory compliance and free financial institutions to focus on their core strengths – delivering top-tier investment products. With Qvonto's innovative technology, we remove 90% of manual compliance tasks and ensure seamless compliance document generation. We service more than 30 investment firms, mainly headquartered in Luxembourg, Switzerland and the Nordics.

Job Description

As a Software Developer at Qvonto, you will be a vital member of our small and growing software development team, contributing to the ongoing development and enhancement of our AI-powered compliance solutions. Your work will play a pivotal role in streamlining the financial sector's compliance processes, enabling our clients to thrive in a rapidly evolving regulatory landscape.

Responsibilities

- Collaborate with cross-functional teams to design, develop, and deploy software solutions.
- Contribute to the creation of AI-driven compliance tools, enhancing efficiency and accuracy.
- Maintain and optimize existing Google Cloud infrastructure implementations (code, data, Docker implementations), Github projects & code, and general software development and testing to ensure peak performance.
- Participate in code reviews to uphold high coding standards and quality.
- Stay current with emerging technologies and industry best practices.

Qualifications

- Bachelor's or Master's degree in Computer Science or a related field.
- Proficiency in Linux operating system and terminal commands.
- Proficiency in several programming languages including SQL, HTML, Javascript, and CSS.
- Strong problem-solving skills and attention to detail.
- Ability to work collaboratively in a fast-paced, agile environment.
- Knowledge of AI and machine learning concepts (a plus).
- Good communication and teamwork skills.

Why Qvonto?

- Join a pioneering fintech company with a significant impact on the financial industry.
- Work at the co-working space, Copenhagen Fintech Lab, surrounded by innovation.
- Opportunity for rapid skill development and career growth.
- Engage with a supportive, dynamic team passionate about making a difference.
- High degree of flexibility and autonomy to work from where you want to.

To seize this exciting opportunity, send your resume and cover letter to Managing Partner Christian W. Lysholm on christian.lysholm@qvonto.com before October 31, 2023. We will be interviewing candidates continuously.
